MASTER OF PUBLIC HEALTH

ABOUT THE PROGRAM

The Master of Public Health (MPH) degree program is designed to provide students with a broad knowledge base regarding the major elements of public health including health services administration, project and program design, epidemiology, biostatistics, environmental health, social and behavioral theory and application, and healthcare policy and law. Students are equipped to pursue a career in the areas of health services administration, epidemiology, or health education. This 42-credit program may also serve as a stepping-stone into various doctoral degrees.

CAREER OPPORTUNITIES

Students are equipped to pursue in-demand careers in the areas of health services administration, epidemiology, or health education including Health Educator, Healthcare Administrator, or Health Data Analyst. Potential employers include local, state, national or international health organizations, private hospitals or clinics, social work organizations, and nonprofit health agencies.

Highlights

- Coursework delivers relevant knowledge and skills in three core areas of public health:
 - Epidemiology/Biostatistics
 - Health Services Administration
 - Health Education/Behavioral Science
- Students receive a practical blend of theory and real-world application of relevant principles
- Graduates leave prepared for leadership careers in the field or to continue with doctoral studies
